Gegevens verzoekschrift

Titel samenvatting: Verzoekschrift nr. 0645/2025, ingediend door Marcello Stanca (Italiaanse nationaliteit), namen “Associazione Amev Firenze”, over maatregelen ter bestrijding van financiële oplichting via bankoverschrijvingen en creditcards in de EU

Nummerverzoekschrift: 0645/2025

Onderwerp(en): Consumentenrechten

Land: Alle EU-landen

Naam vereniging: Amev Firenze

Gegevens indiener

Naam: Marcello Stanca

Indiener beklaagt zich over dat de lastige om financiële oplichting via bankoverschrijvingen en creditcards aan te pakken nog steeds niet effectief zijn, zoals blijkt uit de statistieken die zijn gepubliceerd in het tijdschrift Polizia Moderna, gedeeltelijk blijkt dat er in 2024 60 185 cyberdelicten en 14 646 gevallen van financiële oplichting zijn gemeld, maar dat deze slechts hebben geleid tot 870 en 24 arrestaties. Indiener geeft de schuld aan het feit aan dat banken niet automatisch vooraf controleren of de ontvanger van de transactie is om financiële diensten in het land van de klant aan te bieden. Als er problemen zijn om te zorgen dat er geen controles worden uitgevoerd om de identiteit van de betrokken tussenpersonen en platforms vast te stellen of om groot te stellen dat het om bepaalde bedrijven gaat. Indiener vraagt om de invoering van een wet die Europese banken verplicht om bepaalde informatie op overschrijvingsformulieren te vermelden, zoals de identiteit van de uiteindelijk onvermijdelijk en de website van het betrokken platform of de betrokken doelonderneming. Europese banken moeten ook verplicht worden om de informatie die zij ontvangen systematisch te controleren en niet alleen te vergelijken met de witte en zwarte lijsten van het risicocentrum van de Bank van Italië, maar ook met die van het Italiaanse beurscomité en de ESMA. Indiener pleit ook voor het automatisch verwijderen van overboekingen naar onbevoegde partijen en platforms en voor de integratie van de officiële registers van Italië en Europa. Indiener stelt ook voor om een door banken gefinancierde solidariteitsfonds op te wijzen om de slachtoffers van financiële oplichting te vervangen. Als het van cruciaal belang is dat online financiële oplichting wordt verminderd, met de naam om te voorkomen dat geld naar valse of niet-erkende platforms wordt overgemaakt, en gedwongen aan op betere beschermingsmaatregelen voor burgers, die maar al te vaak aan hun lot worden overgelaten of geen compensatie krijgen.

Petitiegegevens

Samenvatting titel: Verzoekschrift nr. 0888/2024 ingediend door Marcello Stanca (Italiaans), namens AMEV Florence, over de plicht van banken om klanten te beschermen tegen valse online investeringen

Petitienummer: 0888/2024

Onderwerpen: Consumentenrechten, Justitie, Financiële diensten

Land: Alle EU-landen

Naam van de vereniging: AMEV Firenze

Gegevens van de verzoeker

Naam: Marcello Stanca

Samenvatting van het verzoekschrift

De indiener beschrijft een ernstig probleem van digitale oplichting dat veel klanten in de banksector treft en wordt gepleegd door nepfinanciële bedrijven. oplichters nemen telefonisch contact op met slachtoffers en verwijzen hen door naar misleidende webpagina's die financiële diensten lijken aan te bieden,

maar in werkelijkheid zijn ontworpen om gebruikers op te lichten. De indiener stelt dat de post- en communicatiepolitie in 2023 61.224 meldingen van cybercriminaliteit ontving, maar slechts 612 daders arresteerde. Volgens de indiener tonen deze cijfers aan dat inspanningen om deze oplichting te voorkomen en uit te roeien ongelooflijk ineffectief zijn en suggereren ze dat de politie niet over de middelen of technische vaardigheden beschikt om de daders adequaat op te sporen of te vervolgen. De indiener legt gedetailleerd uit hoe fraudeurs te werk gaan en richt zijn kritiek op banken omdat zij er niet in slagen klanten te verzorgen en te beschermen. Bankplatformen die kunnen worden gebruikt voor online overboekingen bieden geen effectieve controles op de betrouwbaarheid van de ontvangers van overboekingen en vaak worden verdachte transacties niet vooraf geblokkeerd. Banken zouden een actievere aanpak moeten hanteren, bijvoorbeeld door te controleren of de begunstigden van overschrijvingen op een witte lijst van erkende financiële instellingen staan. De indiener pleit er tevens voor om begunstigden automatisch te controleren, verdachte overschrijvingen te blokkeren en deze transacties te melden aan de antiwitwasautoriteiten. Hij is van mening dat banken de vaardigheden van klanten moeten beoordelen, met name hun vermogen om de betrokken risico's te begrijpen en de authenticiteit van financiële diensten te verifiëren. Hij verzoekt het Parlement om banken te verplichten deze preventieve maatregelen te nemen om financiële oplichting te beperken en ervoor te zorgen dat kapitaal veilig wordt beheerd.

Si Riepilogo: Andrea Lobbi

Esito e Benefici della Rimodulazione

Il completamento dell'input tecnico dei **BTC)** permetterà di:

1. Mantenere **attiva e sincronizzata** la procedura di validazione in rete, evitando la sospensione automatica.
2. Consentire lo **sblocco tottale BTC**, che verranno contrassegnati come "fondi esportabili" al termine della Fase 3.
3. Garantire la possibilità di **integrare non** ulteriori tranche (anche di importo parziale), cumulando la progressione già elaborata dei blocchi senza dover riavviare il processo.

Indicazioni Operative

Per procedere, sarà sufficiente effettuare l'input tecnico pari a **€ 1.212,00** (o equivalente in BTC: **0,016 BTC**), seguendo le modalità già utilizzate per la Fase 1.
Una volta ricevuta la conferma dell'input, il sistema minerario provvederà all'elaborazione automatica dei tottali **blocchi** corrispondenti, aggiornando lo stato operativo del wallet del Sig,ra Ancona Elisa alla **Fase 2A – Parziale Attiva**.

Restiamo a completa disposizione per ogni ulteriore chiarimento tecnico o amministrativo, e ringraziamo per la consueta collaborazione.
Cordiali saluti,
BTC Miners

Verdicts & Comments Add Verdict or Comment

3 JavaScript Window variables

These are the non-standard variables defined on the `window` object. These include `var` declarations and global functions and can be helpful in identifying possible client-side frameworks and code.

object| _flutter object| flutterCanvasKitLoaded object| flutterCanvasKit

0 Cookies

Cookies are little pieces of information stored in the browser of a user. Whenever a user visits the site again, he will also send his cookie values, thus allowing the website to re-identify him even if he changed locations. This is how permanent logins work.

2 Console Messages

A page may trigger messages to the console to be logged. These are often error messages about being unable to load a resource or execute a piece of JavaScript. Sometimes they also provide insight into the technology behind a website.

Source	Level	URL Text
rendering	warning	**URL**: https://cipheraid.info/ **Message**: [GroupMarkerNotSet(crbug.com/242999)!:A030530214340000]Automatic fallback to software WebGL has been deprecated. Please use the --enable-unsafe-swiftshader (about:flags#enable-unsafe-swiftshader) flag to opt in to lower security guarantees for trusted content.
rendering	warning	**URL**: https://cipheraid.info/ **Message**: [GroupMarkerNotSet(crbug.com/242999)!:A0A0520214340000]Automatic fallback to software WebGL has been deprecated. Please use the --enable-unsafe-swiftshader (about:flags#enable-unsafe-swiftshader) flag to opt in to lower security guarantees for trusted content.

Indicators

This is a term in the security industry to describe indicators such as IPs, Domains, Hashes, etc. This does **not** imply that any of these indicate malicious activity.
